

**BOTSTIBER INSTITUTE**  
FOR WILDLIFE FERTILITY CONTROL

# GRANT APPLICATION GUIDELINES

[www.wildlifefertilitycontrol.org](http://www.wildlifefertilitycontrol.org)

## OUR MISSION

The Botstiber Institute for Wildlife Fertility Control aims to advance the use of sustainable, non-lethal fertility control methods to manage wildlife populations worldwide.

To achieve this goal the Institute educates policymakers, wildlife professionals and the public through:

### EVENTS

- fostering information sharing, networking and collaboration by hosting workshops and symposiums and through the continuation of the International Conference on Wildlife Fertility Control series

### EDUCATION

- educating the public about wildlife fertility control and serving as a resource center by maintaining a repository of information on the field

### GRANTS

- awarding grants to support projects that promote and advance the expansion of practical applications and public policies on wildlife fertility control

To learn more about The Botstiber Institute for Wildlife Fertility Control visit [www.wildlifefertilitycontrol.org](http://www.wildlifefertilitycontrol.org)

The Botstiber Institute for Wildlife Fertility Control (BIWFC) seeks public policy research projects that advance the knowledge, acceptance and implementation of wildlife fertility control as a method of wildlife management throughout the world. The BIWFC's goal is to support projects that will help the public and policy makers understand and evaluate existing public policies on wildlife fertility control.

The BIWFC will support projects that demonstrate ways to examine current management programs and policies, increase public awareness and stimulate and introduce new ideas into the policy debate. Grants may include support for related seminars, surveys, publications, and documentaries.

*Grants for tuition will not be considered. A grant of up to \$25,000 will be considered to support direct project costs, travel, or other necessary expenses. Grants will not support salary/benefits or indirect costs.*

Applicants wishing to be considered for a BIWFC grant should submit a letter of intent (LOI). LOIs may be submitted at any time. BIWFC will review all LOIs within six weeks of submission. The BIWFC may request a full proposal after consideration of the LOI.

To submit a letter of intent, please provide the following:

- Title of project
- Name of applicant
- Country of Citizenship
- Applicant's position and institution (if applicable)
- Current and permanent mailing address
- Current and permanent e-mail address
- Project synopsis
- A specific statement about how the project advances an understanding of wildlife fertility control (not to exceed 100 words)
- What is the final product that you are working to produce at the end of the grant period?
- Amount of money requested and budget (in U.S. dollars)
- Proposed start and end dates of project
- Where did you hear about the BIWFC grant program?

Please do not exceed two pages. Font size should be no smaller than 11. Applications may be submitted by mail or email to the address below. Questions about the application process should be directed to:
